Information for Prospective Students

Tohoku University Graduate School Admission Policy

Philosophy & Mission

With over 100 years of history and distinguished traditions, Tohoku University has developed excellence in education and research under its principles of "Research First," "Open Doors," and "Practice-Oriented Research and Education" since its establishment in 1907. The university will maintain these traditions while looking toward even more dramatic progress in the future. As a world-leading center of education and research, it will contribute greatly to the human race by grappling with the difficult and complex issues facing the 21st century.

Tohoku University will focus its efforts of its faculties, graduate schools, and research institutes to foster ethical international leaders who will carry humanity into the future, while expanding its globally renowned creative research for the benefit of society at large.

Characteristics

1) Three Foundational Ideals

"Research First," "Open Doors," and "Practice-Oriented Research and Education" — soon after its founding, Tohoku University established this set of unique ideals, the substance of which it is continually developing in response to our changing times.

2) Rich Educational Environment

Tohoku University has numerous research organizations and facilities, primarily comprising 10 undergraduate schools, 15 graduate schools, 3 professional graduate schools, and 6 research institutes. Research institute staff also participate in educational activities (there are approx. 3,000 instructors; enrollment limits are approx. 2,400 for undergraduates, 2,700 for graduate students).

3) Research University

Tohoku University is a school that continuously produces numerous internationally recognized research results and concertedly pushes forward with leading-edge research and education.

4) Active Regional/Industrial-Academic Ties

The university is actively working to expand its diverse regional and industrial ties.

5) Globalizing Education and Research

Among Japan's national universities, Tohoku University is one of the top schools in terms of agreements with overseas universities. It is actively expanding exchange in education and research. The university strives to foster globally active individuals through strong support for studying abroad by Japanese students, as well as recruitment of numerous international students.

Ideal Tohoku University Applicants

Tohoku University seeks students who sympathize with the university's principles and who are motivated by:

- 1) the desire to make outstanding contributions as world-class researchers by addressing the issues facing humanity in the 21st century, and
- 2) the desire to make outstanding contributions to the development of society as highly specialized professionals who possess abundant knowledge and leadership.

To realize these ambitions, students should also have strength of will, academic curiosity, a broad perspective, and an excellent foundation of specialized knowledge and abilities.

Tohoku University Admissions Process (Graduate School)

Depending on the number and type of candidates sought, Tohoku University graduate schools provide multiple categories of, and opportunities for undergoing, entrance exams to meet the needs of candidates from diverse backgrounds. Schools may evaluate the candidate's qualifications, abilities, and specialization using interviews, application documents such as research plans, proficiency exams, and external tests.

Graduate School of Life Sciences Admission Policy

The Tohoku University Graduate School of Life Sciences aims to foster leading researchers and engineers who can explore new areas of life sciences using advanced knowledge and technologies. At the same time, we also focus on educating people who can leverage knowledge and technology based on the foundations of life science, and who have a strong background in bioethics and environmental ethics. Therefore, we are looking for students who have a strong motivation to study life sciences and the necessary academic background to complete the program.

In addition to the general selection examinations, we provide special selection examinations for working students, returnee students, and international students. Students are selected based on their motivation to carry out research according to the educational goals of the Graduate School, and their specialized knowledge and skills.

Master's Degree Program (2-year course)

In the first term general selection examination, the applicants are interviewed to evaluate whether they have the basic academic skills and specialized knowledge in each field of life science, as well as the necessary qualifications to carry out research.

In the self-recommendation and the second term general selection examinations, in addition to basic academic skills, specialized knowledge, and qualifications, students' motivation for the research is evaluated through an interview. For the applicants who have studied fields other than life science, the willingness to use their academic knowledge in life science research is also evaluated.

In the special selection examination for working students, the special selection examination for returnee students, and the special selection examination for international students, applicants are interviewed to evaluate their professional knowledge and qualifications according to their respective characteristics. In all these examinations, English proficiency, which is a common language in the academic world, is examined through external examinations.

Before enrolling in the program, students are expected to learn more about the research methods and the specialized knowledge of the field of study in which they intend to major.

Doctoral Degree Program (3-year course)

In the general selection examination, the special selection examination for working students, and the special selection examination for international students, applicants are required to present their past research and plans for their research after entering the university in an interview to evaluate whether they have the necessary specialized knowledge and excellent qualifications to carry out their research. In addition, students are expected to have sufficient proficiency in English, the common language of the academic world.

Before enrolling in this course, students are expected to learn more deeply about research trends in the corresponding field.

Department of Integrative	Few	Cellular Network	Membrane Trafficking Mechanisms, Developmental Dynamics, Organelle Pathophysiology, Super-Network Brain Physiology
Life Sciences		Developmental Regulation Network	Germ Cell Development (*), Cancer Biology, Developmental Neurobiology (*)
		(Cooperative faculties)	Developmental Neuroscience (*), Molecular Oncology
		Biological Dynamics	Plant Development (*), Histogenetic Dynamics, Plant Sensory and Developmental Biology, Organ Morphogenesis, Plant Cell Dynamics
Department of Ecological Developmental	Few students	Ecological Dynamics	Aquatic Ecology (*), Functional Ecology, Ecological Integration, Symbiosis Genomics, Macroecology
Adaptability Life Sciences		Biodiversity Dynamics	Plant Diversity and Evolution, Conservation Biology (*), Marine Biodiversity
		Eco-Socio Dynamics	Ecosystem Functions
		(Cooperative faculties)	Systems Bioinformatics
	tment of cular and Few ical Life students ces	Chemical Biology	Analytical Bioorganic Chemistry, Biostructural Chemistry (*), Bioactive Molecules, Molecular and Cellular Biology, Applied Biological Molecular Science
Department of		Molecular and Network Genomics	Microbial Genetics and Evolution, Plant Molecular Breeding, Molecular Genetics and Physiology, Evolutionary Genomics
Chemical Life Sciences		Multilevel Biomolecular Structure and Dynamics	Molecular Analysis of Biological Functions, Biofunctional Chemistry and Nanobiotechnology, Structural Biology
		Genome Informatics	Omics and Imformatics
		(Cooperative faculties)	Chemical biology of Natural Product, Bioorganic Medicinal Chemistry, Redox Biology, Cellular Function (*), RNA Physiology

1. Departments and the Number of Students to be Accepted

Note: The underlined fields indicate the fields of study in which the cooperating teachers are in charge.

(*) Germ Cell Development, Developmental Neurobiology and Developmental Neuroscience fields from the Department of Integrative Life Sciences, as well as Plant Development, Aquatic Ecology and Conservation Biology fields from the Department of Ecological Developmental Adaptability Life Sciences, and Biostructural Chemistry and Cellular Function from the Department of Molecular and Chemical Life Sciences are not accepting applications.

2. Eligibility and Application Requirements

General Selection, Special Selection for International Students

Applicants for the 3-year Doctoral Course applying for the General Selection and the Special Selection for International Students must fall into one of the following categories.

For the Special Selection for International Students, applicants must be non-Japanese nationals with a "Student" type of visa. Applicants with other types of visas (permanent resident, spouse or child of Japanese national, spouse or child of permanent resident, long-term resident, etc.) should apply through the general selection.

Applicants who have graduated from a six-year undergraduate course in medicine, dentistry, pharmacy, or veterinary medicine fall under (8).

- (1) Those who have received or expect to receive a master's degree or a professional degree by September 2023 from a university in Japan.
- (2) Those who have received or expect to receive a master's degree or a degree equivalent to a professional degree from a graduate school of a foreign university by September 2023.
- (3) Those who have completed in Japan a distance education program provided by a foreign school and have received or are expected to receive a master's degree or a degree equivalent to a professional degree in Japan by September 2023.
- (4) Those who have completed an education program provided by a foreign school in Japan which is designated by the Japanese Minister of Education, Culture, Sports, Science, and Technology (MEXT) as being equivalent to a graduate program in Japan and have received or are expected to receive a master's degree or a degree equivalent to a professional degree by September 2023.
- (5) Those who have completed a program at the United Nations University and have received or are expected to receive a degree equivalent to a master's degree by September 2023.
- (6) Those who have studied on the education program provided by a foreign school, an educational institution with a graduate course in a foreign country, or a United Nations University, who passed an examination and assessment equivalent to those prescribed in Article 16-2 of the Standards for the Establishment of Graduate Schools (Ordinance of the Ministry of Education, Science and Culture No. 28 of 1974), and who is recognized as having academic abilities equivalent or superior to a master's degree holders by September 2023.
- (7) Those designated by the Japanese Minister of Education, Culture, Sports, Science and Technology (MEXT)
 - a) Those who have graduated from a university and have worked for a university or research organization as a researcher for more than 2 years, and who have been recognized by this graduate school as having academic abilities equivalent or superior to a master's degree or a professional degree based on the results of the research.
 - b) Those who have completed 16 years of school education in a foreign country, or have completed 16 years of school education in a foreign country by taking a distance education program provided by a foreign school in Japan, have worked for a university or research organization as a researcher for more than 2 years, and who have been recognized by this graduate school as having academic abilities equivalent or superior to a master's degree or a professional degree based on the results of the research.
- (8) Those who have been recognized by the graduate school as having academic ability equivalent or superior to a master's degree or a professional degree through individual screening of admission qualifications, and who will reach the age of 24 by September 2023.

Note 1: <u>All applicants should contact the faculty member whose supervision they wish to receive, confirm</u> the research plan after admission, obtain confirmation that the faculty member will be able to supervise the applicant, and submit the application form only after informing the prospective supervisor of the intention to apply.

Note 2: Those who are expected to complete the master's course (excluding those who are expected to complete the master's course in this Graduate School) and wish to enter the doctoral course of this Graduate School should apply according to this guideline.

Note 3: Those who wish to apply according to (6) should contact the Academic Affairs Section of the Graduate School of Life Sciences to confirm the documents to be submitted, and submit these documents by Wednesday, May 24, 2023.

Note 4: Those who wish to apply according to (7) or (8) should undergo the following preliminary screening and apply according to the results.

About the preliminary individual screening for admission.

Please submit the following documents to the Academic Affairs Section of the Graduate School of Life Sciences by mail (registered mail) or in person by Wednesday, May 24, 2023.

Notification of the screening results will be sent by registered mail by the start of the application process.

- a. Application form for pre-application screening (Please request an application form from the Academic Affairs Section of the Graduate School of Life Sciences.)
- b. Official academic transcript (prepared by the head of the last institution attended)
- c. Abstract of the research (about two A4 sized pages) and reference materials such as academic papers
- d. Envelope for notification of screening results (standard size, with applicant's name and address written on it, and a stamp of 414 yen)
- e. Other materials that may be used as a reference for a review

Note 5: Those who wish to apply for the Special Selection for International Students should apply to the Academic Affairs Section of the Graduate School of Life Sciences by Wednesday, May 24, 2023, to confirm their eligibility.

Special Selection for Working Students

Applicants for the Doctoral Course (3-year course) applying for the Special Selection for Working Students must fall into one of the following categories.

- (1) Those who have been working at a research institution for at least two years after receiving a master's degree or a professional degree from a university in Japan.
- (2) Those who have been working at a research institution for at least two years after receiving a master's degree or a professional degree from a foreign university.
- (3) Those who have been working at a research institution for at least two years after receiving a master's degree or a professional degree from a distance education program provided by a foreign school.
- (4) Those who have been working at a research institution for at least two years after receiving a master's degree or a professional degree from an education program provided by a foreign school in Japan which is designated by the Japanese Minister of Education, Culture, Sports, Science, and Technology (MEXT) as being equivalent to a graduate program in Japan.
- (5) Those who have been working at a research institution for at least two years after receiving a master's degree or a professional degree from a program at the United Nations University.
- (6) Those who have been working at a research institution for at least two years after studying on the education program provided by a foreign school, an educational institution with a graduate course in a foreign country, or a United Nations University, who passed an examination and assessment equivalent to those prescribed in Article 16-2 of the Standards for the Establishment of Graduate Schools (Ordinance of the Ministry of Education, Science and Culture No. 28 of 1974), and who is recognized as having academic abilities equivalent or superior to a master's degree holders.
- (7) Those who have been working at a research institution for at least 4 years after graduation from a

university and who has been recognized by the graduate school as having academic ability equivalent to or superior to a master's degree or a professional degree.

(8) Those who have experience of working or researching, who have been recognized by the graduate school as having academic ability equivalent or superior to a master's degree or a professional degree through individual screening of admission qualifications, and who will reach the age of 24 by September 2023.

Note 1: Applicants should contact the faculty member whose supervision they wish to receive, prepare the following documents, confirm the research plan after admission, obtain confirmation that the faculty member will be able to supervise the applicant, and submit the application form only after informing the prospective supervisor of the intention to apply.

- a. Abstract of research such as a master's thesis (about one A4-sized page) and reference materials such as academic papers
- b. Summary of research conducted after obtaining a master's degree, etc. (about one A4-sized page)
- c. Field of research applicant wishes to enroll and research plan (about one A4-sized page)

Note 2: Those who wish to apply according to (6) should contact the Academic Affairs Section of the Graduate School of Life Sciences to confirm the documents to be submitted, and submit these documents by Wednesday, May 24, 2023.

Note 3: Those who wish to apply according to (7) should undergo the preliminary screening and apply according to the results. Please submit the following documents to the Academic Affairs Section of the Graduate School of Life Sciences by mail (registered mail) or in person by Wednesday, May 24, 2023. Notification of the screening results will be sent by registered mail by the start of the application process.

- a. Application form for pre-application screening (Please request an application form from the Academic Affairs Section of the Graduate School of Life Sciences.)
- b. Official academic transcript issued by the university attended.
- c. Abstract of the research (about two A4-sized pages) and reference materials such as academic papers
- d. Envelope for notification of screening results (standard size, with applicant's name and address written on it, and a stamp of 414 yen)
- e. Other materials that may be used as a reference for the review

Note 4: Those who wish to apply according to (8) should undergo the preliminary screening and apply according to the results. Please submit the following documents to the Academic Affairs Section of the Graduate School of Life Sciences by mail (registered mail) or in person by Wednesday, May 24, 2023. Notification of the screening results will be sent by registered mail by the start of the application process.

- a. Application form for pre-application screening (Please request an application form from the Academic Affairs Section of the Graduate School of Life Sciences.)
- b. Official academic transcript (prepared by the head of the last institution attended)
- c. Abstract of the research (about two A4 sized pages) and reference materials such as academic papers
- d. Envelope for notification of screening results (standard size, with applicant's name and address written on it, and a stamp of 414 yen)
- e. Other materials that may be used as a reference for the review

Note 5: Those who are employed in private or other companies may enroll while still employed as long as it does not affect their research or take a leave of absence from their current position.

3. Application Period

(1) Applicants are required to carefully read this application guide and upload the application documents to the TAO application registration site (hereinafter referred to as "TAO").

(2) In addition, documents that must be submitted in paper form must be sent or submitted during the following period.

<u>Upload period to TAO</u> From Monday, May 29, 2023 to Friday, June 9, 2023 at 17:00 (JST)

<u>Deadline for submission of application documents (for those documents that must also be submitted in original (hard) paper form)</u>

From Monday, May 29, 2023 to Friday, June 9, 2023 (If mailed, must arrive no later than Friday, June 9, 2023).

In case of submission directly at the office of the Academic Affairs Section, documents can be accepted from 9:00 to 11:50 and from 13:00 to 17:00 on weekdays.

1-1-2 Katahira, Aoba-ku, Sendai 980-8577 Academic Affairs Section, Graduate School of Life Sciences, Tohoku University TEL: 022-217-5706 Email: lif-kyom@grp.tohoku.ac.jp

4. Application Procedures

(1) Application Procedure

Please follow the steps below to submit your application via the TAO. Please note that some documents must be submitted in paper (hard) form.

The application process is completed by paying the application fee, registering the application information online, and sending the required application materials to the university by express or registered mail (must arrive by the application deadline) within the application deadline.

Please note that paying the application fee and registering your application information on the Internet are not the only steps to complete the application process.

1) Confirmation of Application Procedures and Advance Preparation (Preparing Application Materials, Obtaining Application Approval from Prospective Academic Advisor)

First, please read this application guide carefully, confirm that you are eligible to apply, and prepare the necessary application materials.

- Please note that some application materials, such as official TOEFL scores, <u>may take more than a month</u> to be delivered, so be sure to prepare them well in advance.
- Please obtain approval for your application from your academic advisor in the field you wish to study. (For details, please refer to notes 1 and 2 on (2) Application documents and Application materials No. 7.
- 2) Examination Fee Transfer (to be made within the application period)

Transfer the examination fee of 30,000 yen and obtain documents (such as bank statements) to verify the transfer. (For details, see (2) Application Materials No. 8 "Examination fee").

If you are applying from overseas, please contact the Academic Affairs Section of the Graduate School of Life Sciences by email.

- 3) Application registration through TAO
 - a) To use TAO, please create an applicant account on the TAO website below. TAO website: <u>https://admissions-office.net/en/portal</u>

b) Next, check the "TAO Application URL" for the entrance examination you wish to apply for on the Graduate School of Life Sciences Entrance Examination Information website, and register your application by entering information and uploading the designated documents at the TAO Application URL. Graduate School of Life Sciences Entrance Examination Information Website:

https://www.lifesci.tohoku.ac.jp/admission/

• The "TAO Application URL" on the Admission Information website is different for each type of entrance examination. Please make sure that it is the entrance examination you are applying for before registering your application.

• Please be careful not to make any mistakes in selecting the university, department, or entrance exam you are applying for.

• The upload of certificates and other documents is also required at the time of application registration. Please be sure to convert your documents to PDF or another designated format before uploading.

• A temporary save option is available, so please use this function, for example, to make a final confirmation before submitting your application.

4) Submission of original English score

For English scores, in addition to uploading the scores to TAO, "original hard copies of designated scores" must also be submitted. <u>Please make arrangements in advance to have them delivered by the end of the application period.</u>

For details on the required scores and how to send them, please refer to No. 12 of (2) Application Materials.

5) Complete the Graduate School of Life Sciences Application Confirmation Form.

The form will be available on the Graduate School of Life Sciences website at the Admissions Information page (see below) depending on the application period, so please complete the form. Please note that some of the questions on the form overlap with those on the TAO form.

Graduate School of Life Sciences Entrance Examination Information Page: <u>https://www.lifesci.tohoku.ac.jp/admission/</u>

(2) Application documents

Notes:

1) Please contact your prospective supervisor in the field of your interest in advance to fully confirm and mutually understand the research activities and research content that can be conducted in that laboratory.

2) Notify your prospective supervisor that you wish to apply for the entrance examination and obtain his/her approval before applying (see Application Form No. 7).

3) There is a deadline for application. Please contact your academic advisor well in advance.

No.	Documents	Notes
1	Application form	Please fill in the information in each section of the "Application for Admission" on the TAO.
2	Photo data	Upload the applicant's own photo at TAO. - The photo must be taken within 3 months before the application. - The data format must be PNG, JPEG, or JPG.
3	Research plan	 Prepare a research plan for your post-enrollment studies and upload it to the TAO in PDF format. <u>Precautions for Preparation</u> Please write horizontally on the two-page, A4-size document. Please write the applicant's name and field of interest on the first line. The standard font size is 11-12 pt. and the standard number of words in the

		main text is 2,000 (1000 words in English).
		Upload both (1) and (2) below in PDF format to the TAO.
		(1) List of research papers, etc. (Horizontal, A4 size)
		(2) Master's thesis or other representative research papers *The maximum upload size is 20 MB. If you wish to upload more than 20
		MB please contact the Academic Affairs Section of the Graduate School of
		Life Sciences in advance.
		*Those who are currently enrolled in a 2-year Master's course and cannot
4	Research papers	submit their Master's thesis at the time of application should upload the
	1 1	information regarding the possible date of submission and expected title of
		*If the possible submission date is after Thursday June 22 please contact
		your prospective supervisor to obtain his/her approval, and then upload the
		information regarding possible submission date, expected title of the thesis
		and the document stating that you have obtained the professor's approval
		in PDF format to the IAO.
		Upload both (1) and (2) in PDF format to the TAO.
		The original hard copy of the certificate (in paper form) must be submitted
	Transcript of	during the enrollment procedures (in September 2023).

		We recommend that applicants submit TOEFL, TOEIC, IELTS, or Duolingo English Test scores. Tests taken within the two years prior to the first day of the entrance examination are considered valid. Note that it takes time for scores from each test to be delivered. Please take the tests well in advance of your application to ensure that your scores are received in time. Multiple score submissions are allowed. (e.g. one from TOEIC L&R, one from TOEFL iBT, etc.)
		(1) Eligible Scores
		Group TOEIC L&R Group TOEIC IP test score will not be accepted. Official Score Certificate must be submitted.
		> TOEFL iBT (including Home Edition)
	TOEFL®TEST(*) TOEIC®TEST(**)	Group TOEIC ITP test score will not be accepted. Official Score Report must be submitted.
	IELTS or Duolingo score (Not required, but recommended submission)	The score report for the TOEFL iBT test will automatically include two types of scores: the test result for each test date (Test Date score) and the MyBest TM score. The Graduate School will use the Test Date score.
		IELTS (Academic Module only) Test Report Form must be submitted.
12		Duolingo English Score The certificate will be issued only on the Internet. Therefore, you do not need to submit the original paper copy, but it is necessary to pay attention when you take the Duolingo English Test (please refer to (3) below).
	*TOEFL is a registered trademark of Educational Testing Service (ETS). This material has not been reviewed or approved by ETS. ** The "TOEFL® Test" is referred as the "TOEFL iBT" in these guidelines.	(2) Uploading English Scores to TAO
		- <u>If you have the official score sheet in hand</u> , please upload (submit) it to TAO. (File format: PDF, PNG, JPEG or JPG)
		- If you do not have the official score sheet
		copy of the score (or a screenshot of the Internet confirmation screen for test takers, etc.) as a PDF or image file to TAO
		If you have difficulty submitting the official score within the application
		period, please refer to (Note 2) below.
		(3) Submission and Mailing of Original English Scores (Note 2)
		Please prepare and arrange for delivery of the official score sheet by Friday, June 9, as follows
		> TOEIC L&R
		Please send the original Official Score Certificate to the Graduate School of Life Sciences, Tohoku University by the registration (application code: 00015201) on the Score Confirmation Service.
		> TOEFL iBT
		Please make sure that your official score report arrives at the Tohoku University Graduate School of Life Sciences by Friday, June 9. The DI code for ETS is B430 (Graduate School of Life Sciences, Tohoku University).

		 Please note that it will take approximately two months from the time ETS sends your test report to the Graduate School of Life Sciences for delivery. (Please be sure to apply as early as possible, as the arrival time may also vary depending on traffic conditions). Delivery will be confirmed by the Graduate School of Life Sciences. > IETS
		Please send the original Test Report Form (official transcript) by mail.
		Duolingo English Test (No need to submit the original score sheet) Applicants do not need to submit the original score, but after taking the Duolingo English Test, you will be asked to select the school to which you wish to apply, so please select the Graduate School of Life Sciences. Please take the test well in advance, as it may take some time for the score to be evaluated and in some cases the test may not be approved.
		(Note 2) If you have difficulty submitting the designated score by the application deadline
		(1) If you have difficulty submitting the official score by the application deadline, please upload the examinee's score (personal verification) when submitting the application through TAO. In addition, please submit a printed copy of this score by mail. (Must be delivered no later than Friday, June 9)
		(2) Submissions will be accepted only if the score is received by the Graduate School by 17:00 on Friday, June 30.
		(3) The original official score (in paper form) to be submitted must be the same test score (same type of test, same test administration date, same score and rating) as the examinee's score (personal verification) uploaded to the TAO at the time of application. Submission of scores from a different test (e.g., higher test scores) will not be accepted.
13	Filling out the "Application Confirmation Form" for the Graduate School of Life Sciences	Applicants are required to complete the Application Confirmation Form. The form will be available on the Graduate School of Life Sciences Admission Information Website during the application submission period. Admissions information website <u>https://www.lifesci.tohoku.ac.jp/admission/</u>

(3) Notes

1) Please note that applications will not be accepted if there are any omissions or other deficiencies in the information to be entered or registered. Application documents will not be returned.

2) If false information is provided in the application documents or if the original documents cannot be verified at the time of admission, the acceptance of the application may be canceled, or the admission permit may be withdrawn even after the applicant has already been enrolled.

3) In the event of serious misbehavior prior to enrollment, the school reserves the right to cancel acceptance or revoke admission even after the student has been permitted to enter the graduate school.

4) The examination fee is non-refundable for any reason.

5) Once an application has been received, no withdrawals or changes to the information on the application form will be accepted.

5. Examination and Selection

(1) Date	Monday, July 3, 2023 (time will be announced after application)
(2) Place	The examination will be conducted as an online interview. Please arrange a private room with internet access. Make sure that no one is allowed in the room during the examination.
(3) Selection method	Applicants will be evaluated on the basis of a review of application materials and an interview (including foreign language proficiency). Applicants are required to access the URL of the online conference system designated by the Graduate School of Life Sciences and give a 25-minute oral presentation of their master's thesis (or equivalent; for applicants applying for the Special Selection for Working Students, it will be related to their previous research), in Japanese or English, using presentation slides. The presentation will be followed by a 30 minute question-and-answer session.
	Applicants who have completed (or will complete) a 6-year undergraduate program in medicine, dentistry, pharmacy, or veterinary medicine will also take the same examination.

In order to proceed smoothly on the day of the entrance examination, a preliminary connection test for devices (that will be used during the entrance examination) will be conducted on Saturday, June 24. Please be sure to attend this test as well. Details will be notified separately after the application is submitted.

6. Announcement of Results and Enrollment Procedures

(1) The announcement of successful applicants is expected to be posted on the Japanese version of the Graduate School of Life Sciences website on Wednesday, July 12, 2023 at 16:30. The results will also be sent to the applicant by registered mail. The Graduate School of Life Sciences will not respond to any inquiries regarding the results.

Graduate School of Life Sciences website: https://www.lifesci.tohoku.ac.jp/

(2) Successful applicants will be required to pay the following fees by the specified date. Details will be announced separately after mid-August 2023.

a. Admission fee: 282,000 yen (estimated amount)

b. Second semester (October - March) tuition: 267,900 yen (535,800 yen per year) (estimated amount)

Note 1: The amounts shown above are expected amounts. In the event of a revision of the entrance and tuition fees, the new amounts will be used from the time of the revision.

Note 2: Information about the waiver, deferment, and other procedures for entrance fees and tuition fees will be notified in the enrollment procedures documents to be sent after the announcement of the results. For information about the waiver, deferment, etc., please contact the Financial Support Section, Student Support Division, Education and Student Support Department, Tohoku University (Kawauchi-Kita Campus Education and Student Support Center, 1st floor, Counter 4, Tel: 022-795-7816, Office Open Hours: $8: 30 \sim 17: 15$). Tohoku University website (waiver of admission and tuition fees): http://www2.he.tohoku.ac.jp/menjo/

7. Time of Enrollment

The date of enrollment of successful applicants is October 1, 2023.

8. Long-Term Course Program

Those who wish to obtain a Ph. D. degree in life science by systematically completing the educational program over a certain period, exceeding the standard course length of three years in the Doctoral Degree Program, due to special reasons ((1) full-time employees of companies or those who run their businesses, (2) those who need to take care of childbirth, childcare, or nursing care, etc., (3) other students who have been approved by the Graduate School) may be permitted to enroll as a long-term course student by submitting the required application at the time of enrollment procedures based on the notice of enrollment procedures that will be sent to successful applicants. The duration of study cannot exceed six years, but students may request to shorten the approved period of study midway through their studies.

Education and research guidance will be provided using the regular curriculum and class schedule.

The annual tuition fee for long-term course students is the amount obtained by multiplying the annual tuition fee for general students by the number of years of the standard course of study (3 years) and dividing it by the number of years of study permitted for long-term course students.

For reference, the annual tuition fee for students enrolled in the 2023 academic year is as follows. In the event of a revision of the tuition, the new tuition will be used from the time of revision.

- Annual tuition for general students with a standard term of study of 3 years: 535,800 yen
- Annual tuition fee for students with 4 years of study permitted: 401,850 yea
- Annual tuition fee for students with 5 years of study permitted: 321,480 yea
- Annual tuition fee for students with 6 years of study permitted: 267,900 yen

9. Handling of Personal Information

(1) In addition to complying with the "Act on the Protection of Personal Information Held by Independent Administrative Agencies, etc." and other laws and regulations, personal information held by Tohoku University are strictly handled by the "Tohoku University Personal Information Protection Regulations," and every effort is made to protect personal information.

(2) Personal information such as examination results used in the selection of applicants will be used for educational purposes such as selection of applicants, admission procedures, follow-up surveys, post-admission student support (scholarships, tuition exemptions, health care, etc.), and academic guidance, as well as for tuition and other related purposes.

(3) By applying to the Graduate School, applicants are considered to have agreed to the above statement.

10. Other

(1) Application documents and examination fees cannot be returned.

(2) Consultations are available for those who require special consideration for entrance examinations and academic study, so please contact the Academic Affairs Section of the Graduate School of Life Sciences by Monday, May 24, 2023 if needed.

(3) For inquiries regarding student applications, please contact the following

1-1-2 Katahira, Aoba-ku, Sendai 980-8577, JapanAcademic Affairs Section, Graduate School of Life Sciences, Tohoku UniversityTEL +81-22-217-5706E-mail lif-kyom@grp.tohoku.ac.jp

(4) Below you will find the Graduate School of Life Sciences website regarding the admissions process. Please check this page from time to time for the latest information. (Q&A and other information is also available.)

https://www.lifesci.tohoku.ac.jp/admission/

May 2023

Graduate School of Life Sciences,

11. List of Fields of Study for which Students are Accepted (including faculty members and research contents)

1) Department of Integrative I	Life Sciences
--------------------------------	---------------

Faculty members marked with * are scheduled to retire in March 2025.

Course	Field of Study and Faculty Members	Research Content
	Neuroethology Professor TANIMOTO Hiromu Associate Professor KOGANEZAWA Masayuki Assistant Professor HUANG Tzu Ting	We investigate neural mechanisms underlying a wide array of behavior using genetic manipulation of targeted neurons. Our favorite model animals are fruit flies and jellyfish. Behaviors of our interest include associative learning, feeding, sexual behavior, and alcohol preference.
	Molecular Ethology Professor TAKEUCHI Hideaki	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labor atory.html?id=45410
Brain and Nervous System		Visit the lab's website. https://sites.google.com/view/molecular-ethology- laboratory/english
2,500m	Brain Development Professor ABE Kentaro Assistant Professor AOKI Sho	We study the mechanisms underlying the plastic change of the brain according to a variety of postnatal experiences such as social interaction, lifestyles, or diseases. To investigate, we apply the techniques of molecular biology, behavioral analysis, in vivo live imaging on mouse, songbird, and cell culture as model systems.
	Systems Neuroscience Professor TSUTSUI Ken-Ichiro Assistant Professor OHARA Shinya	We investigate sensory, reward, memory, and executive functions and their underlying neural mechanisms by combining various state-of-the-art techniques, such as electrophysiology, molecular biology, and computational analytics and modeling. As experimental subjects, we use human and non-human primates as well as rodents.
	Membrane Trafficking Mechanisms Professor FUKUDA Mitsunori Associate Professor TAJIMA Genichi (C)	Our lab mainly focuses on the Rab protein, which acts as a traffic controller, to understand the molecular mechanisms of membrane traffic that underlies various cellular events such as epithelial polarity formation, exosome secretion, neurotransmission, melanosome transport, and autophagy.
Cellular Network	Developmental Dynamics Professor SUGIMOTO Asako Associate Professor NIWA Shinsuke (C) Assistant Professor HARUTA Nami	Our goal is to elucidate the principles of regulation of cellular dynamics during development and its evolutionary processes. Using several nematode species as model systems, we take an integrated approach that combines molecular genetics, cell biology, biochemistry, and functional genomics. Current research topics include 1) tissue-specific regulation of microtubule dynamics, 2) evolution of the reproductive system, and 3) development of novel chromosome engineering technologies.

Cellular Network	Organelle Pathophysiology Professor TAGUCHI Tomohiko Assistant Professor MUKAI Kojiro	Intracellular organelles cooperatively regulate cellular homeostasis, proliferation, and differentiation, through a continuous exchange of soluble and membrane-bound molecules via membrane trafficking and/or membrane contact transfer. A failure in organelle cooperation often results in various human diseases. Our laboratory uses methods in biochemistry, cell biology, and molecular biology to identify novel organellar proteins and lipids. With these methods, we aim to unveil novel functions of organelles and the molecular mechanisms that regulate organelle cooperation.
	Super-Network Brain Physiology Professor MATSUI Ko	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/laborat ory.html?id=45398
Developmental Regulation Network	Cancer Biology Professor CHIBA Natsuko Assistant Professor YOSHINO Yuki	Accumulation of gene mutations in oncogenes and tumor suppressor genes causes cancer. We elucidate the regulatory mechanism of cell division and DNA damage response by cancer-related molecules. Furthermore, we are trying to develop methods to diagnose and treat cancer by elucidating the carcinogenic mechanism caused by the functional failure of cancer-related molecules.
Cooperative faculties	Molecular Oncology Professor TANAKA Kozo	Chromosomal instability, a condition in which chromo some missegregation occurs at high rates, underlies ag e-related diseases such as cancer and neurological dis orders. Our goal is to reveal how chromosomal instab ility occurs and how it is related to the pathophysiolo gy of these diseases, in order to contribute to their pr evention and treatment. Using culture cells and mice and various technics such as live-cell imaging, bioche mical analysis, genetic and epigenetic analysis, we ai m to understand these mechanisms from molecular to organismal level.

2) Ecological Developmental Adaptability Life Sciences

Course	Field of Study and Faculty Members	Research Content
Biological Dynamics	Histogenetic Dynamics Professor KURANAGA Erina Assistant Professor UMETSU Daiki UECHI Hiroyuki (C)	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labor atory.html?id=2525
	Plant Sensory and Developmental Biology Professor HIGASHITANI Atsushi(C) Associate Professor FUJII Nobuharu	Our research is aimed at understanding the relationship between plant growth and environmental cues such as water and gravity. Important findings include that plant roots show hydrotropism in response to moisture gradients, which, together with gravitropism, plays an important role in regulating root growth orientation in order to efficiently obtain water. We use physiological and genetical analyses to understand regulatory mechanisms of those.
	Organ Morphogenesis Professor TAMURA Koji Assistant Professor SHIOMI Kozue (C) UESAKA Masahiro	We investigate the mechanisms underlying morphogenesis in the vertebrate limb/fin development and regeneration as model systems. Also, we endeavor to elucidate the evolution of developmental programs that diversify the vertebrate morphology through comparative developmental experiments, as well as genomic, transcriptomic, and epigenomic comparisons.
	Plant Cell Dynamics Professor UEDA Minako Assistant Professor KIMATA Yusuke MATSUMOTO Hikari	We aim to understand what happen in the plant cell and how they lead to the plant development. In particular, we are focusing on the cells that play a central role in the plant body formation, such as the zygote, and performing high-resolution live imaging to reveal the intracellular dynamics and genetic analysis to identify the regulatory mechanisms.
Ecological Dynamics	Functional Ecology Professor HIKOSAKA Kouki Assistant Professor TOMIMATSU Hajime	We study ecology of plants mainly by analyses of plant functions such as photosynthesis, resource acquisition and use, and stress responses. Recent our interests are (1) adaptation to various environmental factors with focusing on natural variations, (2) remote sensing of plant functions, (3) modeling of plant functions, and (4) field ecology for moorlands and forests.
	Ecological Integration Professor KONDOH Michio Assistant Professor KAWATSU Kazutaka	Using mathematical and statistical models, we aim to understand the complexity of ecological systems, as well as to develop a field of "practical ecology" that enables prediction, control, and design of ecosystems. (Kondo Lab.)
Ecological Dynamics	Symbiosis Genomics Professor SATO Shusei Associate Professor MITSUI Hisayuki Assistant Professor BAMBA Masaru	The research targets are plant-microbe interaction, based on "symbiosis" in the narrow sense, and environmental interaction, based on "symbiosis" in the broad sense. We are aiming to explore complex interrelated network of organisms and the surrounding environments by using genomics approaches, such as population genomics and comparative genomics.

	-	
	Macroecology Associate Professor KASS, Jamie M.	We conduct research using big data and large-scale analyses to answer pressing questions about biodiversity, which is declining due to human-driven global change. To do this, we employ geospatial analysis and statistical modeling to predict and map species' ranges and biodiversity over space and time. Research applications include range movement due to climate change, alien species invasion risk, ecosystem service provisions, and conservation prioritization. We also develop programming tools to advance macroecological analyses.
Biodiversity Dynamics	Plant Diversity and Evolution Professor MAKI Masayuki Assistant Professor OHYAMA Motonari ITO Takuro	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labor atory.html?id=2552
	Marine Biodiversity Professor KUMANO Gaku KONDO Michio (C) Associate Professor MINOKAWA Takuya Assistant Professor IWASAKI Aiko MORITA Shumpei	We are studying using various kinds of marine animal inhabitants around Asamushi on animal development such as germline development, tissue/organ morphogenesis and cell differentiation, on animal diversity and evolution, and on morphologies of rarely studied animals at their critical developmental stages. We are also studying using marine organisms, such as benthos, on determining their distributions, community structures and diversities through their biological interactions and abiotic factors.
Eco-Socio Dynamics	Ecosystem Functions Visiting Professor TAYASU Ichiro Visiting Associate Professor ISHII Reichiro	We study the ecosystem functions, the evaluation of ecosystem services, and the response mechanisms of ecosystems to global environmental change from the analysis of the structure and dynamics of biological communities using stable isotope approaches and modeling techniques.
Cooperative faculties	Systems Bioinformatics Professor KINOSHITA Kengo	As in the case of the data from next generation sequencer, the experimental data are increasing year by year. The data contribute to the elucidation of life science only when it is analyzed in the correct form and made into information. In this laboratory, we will conduct research on data- driven bioinformatics that analyzes vast amounts of life science-related data, including genome omics, by making full use of data science methods such as machine learning and statistical analysis.

3) Molecular and Chemical Life Science

Course	Field of Study and Faculty Members	Research Content
Chemical Biology	Analytical Bioorganic Chemistry Professor ARIMOTO Hirokazu Assistant Professor TAKAHASHI Daiki	The Arimoto Group studies small molecules that contribute to human health care. We developed AUTAC degraders that selectively degrade cytoplasmic materials via autophagy; the removal of "dysfunctional mitochondria, protein aggregates, and pathogens" utilizing AUTAC technology will contribute to the control of disease and aging. We are also developing antimicrobial agents against vancomycin-resistant strains. We utilize a variety of chemical and biological techniques, including eukaryotic and bacterial cell culture, biochemistry, molecular biology, and organic synthesis.
	Bioactive Molecules Professor ISHIKAWA Minoru Assistant Professor TOMOSHIGE Shusuke SATO Shinichi (C)	We study novel strategies that employ methods of organic chemistry, and molecular and cellular biology to regulate disease related proteins. An example is PROTAC (proteolysis targeting chimera) which induces degradation of a target protein through hijacking ubiquitin-proteasome system. Our research focuses on PROTAC for the treatment of neurodegenerative diseases.
	Molecular and Cellular Biology Professor OHASHI Kazumasa Associate Professor YASUMOTO Ken-ichi Assistant Professor CHIBA Shuhei	Our research focuses on the phenomenon that cells sense and respond to the external environment. We aim to elucidate the molecular mechanisms that regulate cell morphology, motility, growth, differentiation, and ordering of cell populations in mammalian cells by sensing mechanical stresses such as stiffness and force subjected to the external environment. We will also elucidate the molecular mechanisms of the cellular stress response.
	Applied Biological Molecular Science Professor TANAKA Yoshikazu Assistant Professor YOKOYAMA Takeshi	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=2518
Molecular and Network Genomics	Microbial Genetics and Evolution Professor NAGATA Yuji Associate Professor OTSUBO Yoshiyuki Assistant Professor KISHIDA Kouhei	Some bacteria can degrade anthropogenic pollutants. We aim to comprehensively understand how such bacteria adapt and/or evolve quickly toward environmental changes by using microbiological, molecular genetic, molecular biological, protein engineering, cell biological, genomic, and ecological approaches, as well as to develop new technologies to effectively utilize unexplored microbial functions.

Molecular and Network Genomics	Plant Molecular Breeding Professor WATANABE Masao Associate Professor KANNO Akira	The development of high-speed genome analysis and genome editing technologies is making it possible to conduct molecular breeding of higher plants. Based on these technologies, we will conduct interdisciplinary research to elucidate the functional principles of key genes that control flower morphogenesis and reproductive processes in plants. Through molecular modification of key genes based on these studies, we aim to achieve a comprehensive understanding of the network of key genes regulating the flower morphogenesis and reproduction in plants.
	Molecular Genetics and Physiology Professor HIGASHITANI Atsushi Associate Professor HIDEMA Jun Assistant Professor TERANISHI Mika	We are investigating the survival strategy of living organisms, plants and nematodes at the molecular and physiological levels. In particular, the main focus is on the effects of ultraviolet light (UVB), space microgravity and aging on damage to DNA, organelles, and tissues.
	Evolutionary Genomics Professor MAKINO Takashi Lecturer YOKOYAMA Ryusuke Assistant Professor BESSHO Kanako	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=45408 Visit the lab's website. https://www.lifesci.tohoku.ac.jp/evolgenomics/home-en/
Multilevel Biomolecular Structure and Dynamics	Molecular Analysis of Biological Functions Professor TAKAHASHI Satoshi Associate Professor KAMAGATA Kiyoto Assistant Professor OIKAWA Hiroyuki	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=2519
	Biofunctional Chemistry and Nanobiotechnology Professor MIZUKAMI Shin Assistant Professor KOWADA Toshiyuki	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=2526 Visit the lab's website. http://www2.tagen.tohoku.ac.jp/lab/mizukami/html/inde x.html
	Structural Biology Professor INABA Kenji Associate Professor KADOKURA Hiroshi OKUMURA Masaki (C) Assistant Professor WATANABE Satoshi	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=2524

	Structural Mechanism Research and Development Professor YONEKURA Koji TAKAHASHI Satoshi(C) Associate Professor HAMAGUCHI Tasuku	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora toryid-45416.html
Genome Informatics	Omics and Imformatics Visiting Professor HIRAKAWA Hideki Visiting Professor IKEDA Kazutaka	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=2549 Visit the lab's website. http://www.kazusa.or.jp/en/
Cooperative faculties	Chemical biology of Natural Product Professor UEDA Minoru	Laboratories in Graduate School of Life Sciences website https://www.lifesci.tohoku.ac.jp/en/research/fields/labora tory.html?id=45402
	Bioorganic Medicinal Chemistry Professor DOI Takayuki	Synthetic methods for biologically active natural products and application to the rapid synthesis of their analogues are studied to elucidate the structure-activity relationship and their target molecules. We aim to clarify the structural features necessary for the expression of activities and to discover new potent compounds.
	Redox Biology Professor MOTOHASHI Hozumi	Redox reactions play central roles in energy metabolism, signal transduction, and proteostasis. Our goal is to understand pathogenesis of age-related diseases, such as cancers and chronic inflammation, from the view point of redox regulation using biochemical and molecular biological approaches.
	RNA Physiology Professor WEI Fan-Yan Assistant Professor OGAWA Akiko MATSUDA Shigeru	The primary interest of our laboratory is the post- transcriptional modification of RNA in mammalian cells. We aim to elucidate the biological functions of RNA modification in the regulation of energy metabolism, protein translation, and cell signaling, and to understand how RNA modification is involved in the regulation of physiological functions in vivo and in the development of disease. We hope to apply RNA modification technology to establish new disease biomarkers and contribute to drug discovery.

Notes: - Information about research in each laboratory of the Graduate School of Life Sciences, Tohoku University: <u>https://www.lifesci.tohoku.ac.jp/en/research/fields/</u>

- The campuses of the Graduate School are located in Sendai City, Aomori City (Aomori Prefecture), Kyoto City (Kyoto Prefecture), and Kisarazu City (Chiba Prefecture). The Marine Biodiversity Field is located at the Asamushi Research Center for Marine Biology belonging to the Graduate School in Asamushi, Aomori City, Aomori Prefecture. The Ecosystem Functions Field is located at the Research Institute for Humanity and Nature, Kyoto, Japan. The Omics and Informatics Field is located at the Kazusa DNA Research Institute in Kisarazu, Chiba, Japan.
